Time taken	8 mins 22 secs
Grade	4.00 out of 5.00 (80%)

Question **1**

Correct

1.00 points out of 1.00

Choose the statement that defines a character field containing an ampersand (“&”)

Select one:

- ☐ A. DS C'AT'&'T'
- ☐ B. Ampersands are not allowed in character fields
- ☐ C. DS C'AT'&&'T'
- ☒ D. DC C'AT&&'T' ✓
- ☐ E. DC C'AT&'T'

Correct!

To specify a single ampersand in a character field, we must use two consecutive ampersands.

The correct answer is:

DC C'AT&&'T'

Question **2**

Correct

1.00 points out of 1.00

[Back](#)[Next](#)

Literals start with the character “=”

Select one:

- ☒ True ✓
- ☐ False

Correct!

The correct answer is 'True'.

Question **3**

Correct

1.00 points out of 1.00

To specify a character field containing a single quote, we must use two single quotes, like this:

AIRPORT DC C'O"Hare'

Select one:

- ☒ True ✓
- ☐ False

Correct!

The correct answer is 'True'.

Question **4**

Incorrect

0.00 points out of 1.00

[Back](#)[Next](#)

Which of these statements causes the next location to be on a **doubleword** alignment? (Select 3)

Select one or more:

- ☐ A. DC 0FD'0'
- ☐ B. DC FD'0'
- ☐ C. DC 2F'0'
- ☐ D. DC 0D'0'
- ☒ E. DC 4H'0' ✕

The three correct answers are:

DC 0FD'0' The zero duplication factor means that no data is reserved, but the next field will start on a doubleword boundary.

DC 0D'0' This is commonly used to enforce doubleword alignment in older programs.

DC FD'0' This reserves an aligned doubleword binary integer with an initial value of zero. The next location will be on a doubleword alignment.

Regarding the incorrect answers, they can't guarantee that the next field will be doubleword aligned:

DC 2F'0' These are fullword, not doubleword, aligned.

DC 4H'0' These are halfword, not doubleword, aligned.

The correct answers are:

DC 0FD'0'

,

DC 0D'0'

,

DC FD'0'

Question 5

Correct

1.00 points out of 1.00

[Back](#)[Next](#)

Identify the two statement that define the same field type and same initial value

Select one or more:

- ☒ A. DC FD'123456789' ✓
- ☐ B. DC D'123 456 789'
- ☐ C. DC C'123456789'
- ☒ D. DC FD'123 456 789' ✓
- ☐ E. DC 2F'123456789'

Correct!

These two statements define a doubleword binary integer with the same initial value:

DC FD'123 456 789'

DC FD'123456789'

(The spaces are ignored by the Assembler and are for readability.)

DC D'123 456 789' defines a floating-point number, not a binary integer

DC C'123456789' defines a character field

DC 2F'123456789' defines two consecutive fullwords

The correct answers are:

DC FD'123 456 789'

,

DC FD'123456789'
